

BRIDGE REPAIR

CVSD has completed all of the bridge repair items listed by the Arkansas Highway and Transportation's inspections. Minor work was done on Cherokee Road Baseheart High Bridge and the North Course Bridge. Major work requiring over three weeks labor was completed on the Flathead Bridge.

FEMA

CVSD is still waiting on FEMA payments to purchase a new backhoe.

MECHANIC'S CORNER

The CVSD Mechanics have completed 16 work orders, of these jobs, one was for CVPD and one was for CVPZ. Projects included various tractor repairs, updating the service truck, and customizing the mini truck as a paint striping vehicle.

CVSD received **133** work order **requests** and **completed 115** work orders.

GRANTS UPDATE

CVSD is still benefiting from using NADC grant workers at no expense to the city. We currently have a total of four workers remaining, though we will lose another in July.

NEW HOT MIX ASPHALT WORK

CVSD assisted in the installation of hot mix asphalt road surface on the west end Alcana Drive and on the Lake Sequoyah dam. This type of surface should give many years of service with minimal maintenance cost.

ROAD PRESEVATION – A PRIORITY

CVSD treated Pontiac Dr, Mandan Dr, Okmulgee Dr, and Allegheny Dr with a fogging oil asphalt rejuvenator. This will increase the roads surface life up to three + years. Chip sealing road work is also scheduled for this year.
