

Seed Thoughts for The Plan Revision 2014

- Objective to grow Cherokee Village population is core idea. Growth would fix a lot of the problems. Our primary asset remains unchanged, the natural beauty.
 - Attracting more visitors and tourists should continue to be a goal. The new effort to have 4 seasonal festivals should be promoted internally and externally as this attracts visitors and builds community. The attraction of CV's low cost of living and reasonable cost of homes should be leveraged for more relocations. People inviting relatives and friends to CV are known to be effective in getting relocations. These are proven ways to get new residents.
- Add New Businesses to serve the needs of CV and provide jobs. Adding Businesses is helpful in meeting the growth objective because it tends to build the middle class. New Businesses would bolster the economy. Some Businesses would be supportive of our goal to attract visitors and tourists. Generally success builds success and likewise adding Businesses will add Businesses.
- Upgrade the recreational facilities. It is just fundamental this is needed because CV is a recreational community.
- The Airport is a great asset we should better utilize.
- The Village Art Center deserves our support which most likely would take the form of promotions. It has brought out artists in our area and has the potential to anchor Town Center with other things such as Coffee/Ice-Cream/Sandwich Shops.
- Beautification of CV is needed. We corrupt the natural beauty of CV when we do not maintain it. Beauty is in the eye of the beholder it is said and where the Beautification is needed is therefore dependent on the beholder. It is everything such as fixing sidewalks, street signs, lighting, tend flower sites, remove dead trees, eliminate trash, etc.
- Infrastructure Improvements needed. These tend to be expensive. The most the P&P is likely to do is draw attention to the needs and work through the Planning Commission to start efforts. Some of the needs are bridges, better roads, energy improvements, etc.
